

### Abstract

**Czech SME is looking for a technology of processing waste into furnace oil. The origin of waste could be industry or households. The SME is looking for a partner for joint-venture, licence agreement or technical cooperation.**

### Description

The company is looking for a technology of processing waste into furnace oil. The requested technology should be fully developed and preferably not yet introduced to the Czech market. The origin of waste could be industry or households. The company will consider any reasonable technology.

The company looks for a partner who will be able to install the sought technology and help with the start of manufacturing process. The envisaged cooperation is expected to be based on licence, joint-venture or commercial agreement with technical assistance.

### Technical Specifications / Specific technical requirements of the request

The requested technology should fulfil following requirements:

- recycling of industry or household waste;
- reasonable production costs;
- safety production and environmental friendliness;
- service of installed technology.
