

Abstract

An Irish SME is involved in the production of Energy from Biomass, and seeks to acquire technology for the efficient Gasification or Pyrolysis of Waste Wood.

A license or joint venture agreement is sought for multiple installations.

Description

An Irish SME operates in the Biomass Energy Sector and provides "Technology Solutions" for specific waste and biomass fuel streams. They wish to acquire the technology for the efficient gasification or pyrolysis of waste wood under license agreement.

Technical Specifications / Specific technical requirements of the request

The Gasification/Pyrolysis Technology must meet all the relevant current and proposed EU legislation with respect to material processed and emissions.

The Engineering System should be able to process waste wood from construction/demolition and waste packaging sources. There should ideally be a reference site available for evaluation.
