

## Newsletter n° 2/2007 - January

---

### Featured Companies

---

#### **MeWa Recycling Maschinen und Anlagenbau GmbH**

For more than 20 years, MeWa has been developing and building shredding machines and recycling plants for the recycling of all kinds of waste materials.

---

#### **AXO Shredders Ltd**

AXO Shredders is a world leading manufacturer of machinery specifically designed to suit the paper shredding and recycling industry.

---

### Featured Events

---

**14th European Conference on Tyre Recycling**  
**21-23 March 2007 , Brussels, Belgium**

---

**ASK FOR  
DETAILS**

**click here**

### **14th ETRA Conference on Tyre Recycling**

ETRA, the European Tyre Recycling Association, is the only European organisation devoted exclusively to tyre and rubber recycling.

The 14th annual ETRA conference will include speakers representatives of Parliament, the Commission and other EU bodies well as tyre recyclers, material users, research and development teams from the Member States and beyond.

21-23 March 2007 , Brussels, Belgium

---

### **Sep - Eco technologies exhibition**

The great international event dedicated to public services, anti-pollution technologies in productive processes, city management and energy. Simultaneously, study days, an opportunity for operators to update their knowledge, are held on the most significant current themes in the sector

18-21 April 2007 , Padua, Italy

**APRIL'07  
Padua**

---

## **Latest News**

---

### **Liquid fuel from common trash: new technology coverts municipal waste into ethanol**

30/01/2007 (newstarget.com)

A new conversion technology takes organic items otherwise headed for the landfill and turns them into usable fuel. The double-punch effect of this technology comes from the fact that it vaporizes organic material, releasing a mixture of hydrogen and carbon monoxide, which can be synthesized to create other gasses and chemicals...

---

### **Nova Scotia chooses cement kiln for tires**

*30/01/2007 (solidwastemag.com)*

Nova Scotia's Resource Recovery Fund Board, a non-profit organization which is responsible for solid-waste management in that province, has approved plans by Lafarge Canada Inc. to burn scrap tires as an alternative fuel in its cement plant in Brookfield, N. S. The plan is still subject to approval from the provincial government.

---

### **Cost benefit assessment of waste options**

*30/01/2007 (PRé Partner Network)*

In a study by 2.-0 LCA Consultants for the EU Commission (DG-JRC) different municipal waste treatment scenarios have been analyzed, using the most recent generic data sources for the different technologies

---

### **China orders investigations into foreign waste imports**

*27/01/2007 (letsrecycle.com)*

China's State Environmental Protection Administration (SEPA) said yesterday that recent media reports from Britain had drawn its attention to the issue of waste material being smuggled into China. SEPA has ordered environmental authorities in the Guangdong Province to launch an immediate investigation, focussing on the area around Lianjiao Village in Foshan City, which has been identified as a centre for plastics reprocessing. Efforts to improve legislation controls and the monitoring of waste processing operations have been ordered...

---

### Finland to triple biowaste burning

26/01/2007 (endseuropedaily.com)

A national waste plan proposed by the Finnish environment ministry on Tuesday envisages a major expansion of incineration to help achieve EU targets for diverting biodegradable wastes from landfill. The plan envisages that 31 per cent of municipal waste will be burned by 2016, compared with 9 per cent in 2003. There is currently only one municipal waste incinerator in Finland. Several more will need to be built...

---

### Stakeholders blast commission car recycling plan

26/01/2007 (endseuropedaily.com)

Industry stakeholders have slammed the European commission's decision last week to endorse EU targets to recycle 85 per cent and recover 95 per cent of scrap cars in Europe by 2015. The 2015 targets were set in the 2000 end-of-life vehicles (ELV) directive, subject to confirmation by MEPs and governments based on a report by the commission...

---

### Canadian Company Recycles Shingles for Road Applications

26/01/2007 (recyclingtoday.com)

Canadian recycler Halifax C&D Recycling Ltd. has received \$67,000 in funding from the Resource Recovery Fund Board of Nova Scotia to help it purchase equipment to process asphalt shingles, according to a report in the Chronicle Herald (Halifax, Nova Scotia, Canada)...

---

## RMDAS Ferrous Scrap Pricing Makes Healthy Jump

26/01/2007 (recyclingtoday.com)

The New Year has started positively for scrap processors, as steel mill buyers were paying anywhere from \$19 to \$34 per ton more for the most common ferrous scrap grades in January purchases recorded throughout the United States. (To view the prices click on the following link -- RMDAS Scrap Prices )

---

## Ghana - Plastics Scrap

26/01/2007 (Knoten Weimar)

Only five percent of waste is reused or recycled in Ghana, even though plastic packaging makes up around 80 percent of the entire waste. One large problem in cities is that water is consumed from small plastic sachets that are sold on the streets. There is an effort to get the approximately 1500 plastic drink bag producers to contribute to the costs of removing the waste...

---

## Denmark launches "visionary" green energy plan

24/01/2007 (endseuropedaily.com)

The Danish government has published what it describes as "an ambitious and visionary" energy strategy aimed at cutting fossil fuel consumption by up to 15 percent and doubling energy supply from renewable sources to 30 per cent of the total by 2025. Follow-up : Danish energy ministry

---

## California: New E-Scrap Recycler Opens

21/01/2007 (recyclingtoday.com)

E-World Recyclers, a new electronic scrap recycling company has opened in Vista, Calif. The company is able to handle a wide range of e-scrap, including computer monitors, television sets, CPUs, hard drives, and other equipment...

---

### [Commission firm on 2015 car recycling goal](#)

16/01/2007 (endseuropedaily.com)

A requirement for EU governments to recycle 85 per cent and recover 95 per cent of scrap cars in Europe by 2015 should be kept in place, the European commission recommends in a report adopted on Tuesday. The targets are environmentally and economically optimal, it concludes, and should be retained to drive eco-innovation...

---

### **Latest TO/TR (Technology Offers / Technology Requests)**

---

#### [Procedure for obtaining grains from the red mud of the Bayer process](#)

A research group of Galicia, in the North West of Spain, has developed a new procedure for the obtaining grains from the red mud of the Bayer process. A granulated drying method and the calcination at high temperatures makes possible this process. They are interested in a license agreement.

(Ref: GA/PSARID/9504 - 30/01/2007)

---

#### [Polyester Polyols from Renewable and Waste Raw Materials](#)

A Polish research institute is one of the leaders in the field of industrial chemistry. The institute offers an innovative technology of production of polyester polyols using low-cost

renewable, vegetable oils and waste plastic recycle from used PET (polyethylene terephthalate) bottles. The technology considerably cuts the costs of the raw materials being applied for the production of polyurethane coatings and foamed plastics. Partners interested in license agreement are being sought.

(Ref: 05 PL SPOP OCVE - 26/01/2007)

---

### Sustainable recycling treatment of non-ferrous metal residues

A Brussels company has developed a unique expertise in the treatment of non-ferrous metal residues such as zinc, nickel, copper, lead, tin, etc. Through hydrometallurgical processes, this company is able to recycle the totality of these non-ferrous elements. The company is looking for technical co-operation with industrial partners dealing with non-ferrous metal residues to adapt these new processes to their treatment needs.

(Ref: BIRC/E/241103 - 26/01/2007)

---

### Technical solution for efficient aerobic organics waste management.

A Swedish SME offers a method for fast, rapid and efficient decomposition of organic waste. Due to an optimised process, the decomposition from organic waste to biomass can be achieved in 20-25 hours. The resulting biomass can be used as soil conditioner, fertilizer etc. The company is looking for industrial partners and organisations active within waste management for commercial agreements with technical assistance.

(Ref: 06 SE CSAA OGYW - 24/01/2007)

---

### Shredding machines based on one- and two-shaft systems

A German company has been manufacturing custom-made innovative fragmentising machines for volume reduction and recycling for 30 years. It offers compact modular shredding systems ("desktop-model") for nearly each area of application with a focus on industrial and production waste. The volume of waste can be reduced up to 80%, thereby reducing the volume-dependent storage, transport and dumping costs crucially. Users and partners are sought for commercial agreement.

(Ref: 04 DE HRTM OAML - 24/01/2007)

---

Wastepaper baskets treated by innovative technologies such as phosphate coating, electrophoresis and polyester powder for outdoor use

An Italian company specialised in street furniture produces various kind of wastepaper baskets using innovative technologies such as phosphate coating, electrophoresis and polyester powder for outdoor use. The above-mentioned company is seeking a sub-contracting co-operation or a commercial agreement with technical assistance.

(Ref: 05 IT LOCM OC1F - 23/01/2007)

---

Easily collapsible and recyclable PET (Polyethylene Terephthalate) bottle for utilisation in the beverage industry

A Czech inventor has developed a new design for PET bottles, which can easily be compressed with slight hand pressure on the upper part of the bottle. This is possible through the accordion form of the bottle, which enables effortless separation of label & cap for increasing the quality of secondary raw material. The consumer & the producer save space during the storage & transport of used bottles. The inventor is looking for companies interested in commercial utilisation & further development..

(Ref: 05 CS CZBO 0BVJ - 19/01/2007)

---

#### Economical recycling of precious metals used in electroplating for surface

A Hungarian SME offers a metal recovery technology applied in galvanisation technology for surface treatment purposes. The company deals with design, manufacturing and assembly of galvanisation equipment, and with the sale of galvanisation chemicals. The surplus metal appears directly in the form of a solid plate. The company looks for an industrial/service company with experience in electroplating.

(Ref: 06 HU HUTP 0E9A - 18/01/2007)

---

#### A fast, portable & safe system for crushing fluorescent tubes on site

A UK-based environmental company has developed an innovative system that crushes used fluorescent tubes quickly and safely on site. The patented EC-marked system improves the health and safety of workers and minimises the bulk of used lamps at customer premises before removal to the recycling plant. Advantages include ease of use, reduced storage and minimal environmental emissions associated with transport. The company seeks partners active in the collection/recycling of fluorescent tubes.

(Ref: 06 GB EAST 0FSJ - 18/01/2007)

---

#### Treatment of contaminated plastic wastes for recycling

A UK SME has developed a process to treat contaminated plastic waste such as is generated in catering kitchens, food processing, and laboratories. The processed plastic waste is both sterile and inert, and can be re-used to manufacture products, as low-cost

filler, or as waste-to-energy feedstock. The company seeks partner companies to participate in adapting the technology to suit local/regional requirements and to develop new applications for the technology in existing and new sectors.

(Ref: 07 GB MICU 0H2M - 17/01/2007)

---

#### Useful disposal of sludge by injection into arable soil

A Hungarian company has developed a technology for useful disposal of sludge originating from communal wastewater systems and industrial foodstuffs processing as well as liquid manure, by injecting it into the soil without any harmful environmental influence. With this technology of economical use of sludge, the company is looking for industrial partner for technical cooperation.

(Ref: 05 HU HUTP 0DAP - 16/01/2007)

---

#### Technology for manufacturing environment-friendly pallets made of recycled paper

A Hungarian SME offers environment-friendly packaging technology for heavy-duty pallets manufactured with paper, for aesthetic, hygienic packaging of high-standard products. The procedure allows the creation of clean and aesthetic unit loads of e.g. food, pharmaceutical and micro electronic products. The used pallets can be recycled as waste paper. Cooperation partners for license/manufacturing agreement are welcome.

(Ref: 06 HU HUBU 0E7S - 16/01/2007)

---

#### Metal reclamation technology in electroplating

A Hungarian SME offers equipment for recovering metals, applied in electroplating technique of surface treatment. It can be used to recover the metal waste that arises

during the silver, copper, tin, nickel, eventually zinc plating process and it can be recycled into the electroplating process. The investment returns in 3 or 4 years.

Cooperation partner for making license agreement is awaited.

(Ref: 06 HU HUTP 0E6Y - 15/01/2007)

## Next Events

---

### ENVIRONMENT 2007

The 4th Major International Exhibition and Conference to be held at the Abu Dhabi International Exhibition Center, under the patronage of the UAE President, His Highness Sheikh Khalifa Bin Zayed Al Nahyan. The focus of this prestigious event will be on Air, Energy, Water, and Waste, providing an ideal platform to promote products and services that relate to these very important elements.

28 - 31 January 2007 Abu Dhabi, United Arab Emirates

---

### 4-th International Conference Cooperation for Waste Issues

Primary topics of the Conference will be:

- Legal and regulatory framework of waste management
- Sanitary, environmental, institutional and economic aspects of waste management
- Waste management technologies, equipment and services
- Landfill construction and operation
- Wastewater treatment. Sludge management. Sludge fields
- Air emissions. Gaseous emission treatment. Dust and slag management
- Waste to energy
- Informational, programming and metrological support
- Environmental

insurance systems, certification, standardization, audit, due diligence review • Public participation in waste management

31 January - 01 February 2007 Kharkiv, Ukraine

---

#### 4-th International Conference: Cooperation for Waste Issues

The Conference objective is to support and promote the transfer and exchange of best practices and experience, and the development of environmentally sound waste management business; to present new developments, equipment and services; to establish and strengthen contacts between the interested parties; to attract attention of investors, industry managers, business community, public groups, government officials and mass media to the issue of waste management.

31 January - 01 February 2007 Kharkiv, Ukraine

---

#### SERDC/TRC Joint Conference and Exhibition

The Southeast Recycling Development Council (SERDC) and the Tennessee Recycling Coalition (TRC) are hosting the 2007 Joint Southeast Regional Conference and Exhibition at the Opryland Radisson in Nashville February 7 to 9. According to the two organizations, the event will feature exhibits, educational sessions on a variety of topics, formal and informal networking opportunities, an awards event and a workshop on commodities.

07 - 09 February 2007 Nashville, Tennessee, United States

---

#### The Plastics Recycling Conference 2007

Plastics Recycling 2007: The North American Plastics Recycling Conference presented by  
Plastics Recycling Update and Resource Recycling magazine

13 - 14 February 2007 Dallas, Texas, United States

---

### Sustainable Use of Biomass: in Soils or as Energy Source

ECN Joint Workshop "Sustainable Use of Biomass: in Soil or an Energy Source" (Including  
a Workshop on "Brown Bin Collection)

19 - 21 February 2007 Dublin Castle, Ireland

---

### Plastasia 2007

Plastasia-2007 has been planned with a view to provide an opportunity for all those  
related with the Plastic Industry to showcase their products and services. Plastasia-2007  
will be the meeting point where business connections will develop & flourish.

23 - 26 February 2007 Bangalore, India

---

### SWANA's Recycling & Special Waste Conference

30 Speakers, 3 Panel Discussions, 6 Certification Courses, Table-Top Trade Show.

26 February 2007 Tampa, Florida, Italy

---

### FILTECH 2007

The international conference with 150 technical papers and presentations features the  
latest developments and innovations worldwide on the complex field of filtration and

separation. Technology and know-how transfer is a main target. The conference is informative for all those concerned with designing, improving, purchasing, selling or researching filtration and separation equipment and services.

27 February - 01 March 2007 Wiesbaden, Germany

---

### **Ecocity 2007**

Ecocity, Cities Equipments and Environment Exhibition, is the result of uniting Ecomed, International Energy and Environment Show, with the municipal services and city equipment sector. In Ecocity, exhibiting companies will find more business possibilities since the new show is more suited to market needs. Visitors will be able to see the most advanced environmental solutions and the latest in street furniture, infrastructures, transport, etc.

27 February - 02 March 2007 Barcelona, Spain

---

### **SWANA's 30th Annual Landfill Gas Symposium**

30 th Anniversary of the Wird's premier Forum on Landfill Gas Utilization Technology

04 - 08 March 2007 Monterey, California, United States

---

### **TerraTec 2007 - International Trade Fair for Environmental Technologies and Services**

In 2007, TerraTec will be the only environmental trade fair in Germany: as the major get-together of the industry, taking place from 5th - 8th March 2007 in Leipzig for already the 10th time, TerraTec will be showing off the complete standard of performance of environmental technology and the extensive range of environmental services. TerraTec in Leipzig is the trendsetting information medium for the market in Germany, Central,

Eastern and South-Eastern Europe and the perfect platform on which to solve specific questions.

05 - 08 March 2007 Leipzig, Germany

---

### **World Biofuels Markets**

World Biofuels Markets will provide the best possible platform to network, learn and do business with the international biofuels community

06 - 09 March 2007 Brussels, Belgium

---

### **2nd Seminar on Recycling of Non-Ferrous Metals in India**

The event will feature some of the leading experts and specialists from India and abroad and intends to cover following topics amongst others: Present scenario of Non-ferrous Metal recycling in the Country Need and way for adopting appropriate R&D and Technology for efficient Recycling.

07 March 2007 Mumbai, India

---

### **Irish Recycling & Waste Management (IRWM)**

Launched in 2000, IRWM is the premier exhibition for all those involved in Recycling & Waste Management throughout Ireland. Dedicated to the needs of professionals from both local authorities and industry, the show continues to reflect the huge growth the sector has experienced in the last few years.

07 - 08 March 2007 Dublin, Ireland

---

## The 20th Annual Southeast Recycling Conference & Trade Show (SERC)

Each year the Southeast Recycling Conference & Trade Show (SERC) provides the premier forum for informing the public and private sectors of the economic and environmental significance of recycling and waste reduction in the Southeast. Attendees will have excellent networking opportunities and a chance to visit the exhibits to preview the newest advances in recycled products and services.

11 - 14 March 2007 Orange Beach, Alabama, United States

---

## Waste Tech Landfill Technology Conference

The Waste Tech Landfill Technology Conference is an industry-recognized educational event that focuses on the latest issues that affect the landfill industry. Each year, the landfill industry's most powerful leaders gather to learn, network, and have lots of fun.

12 - 13 March 2007 Miami, FL, United States

---

## Energy from Waste 2007 - Targets and beyond: Waste management and energy recovery in a changing world

2007 will be a year of change and development for the waste industry with many implications for local authorities, making this conference very timely. The three main themes are: Responding to change - in legislation, expectation and environment; Aiming for efficiency - in waste management and energy development; Advancing technologies - a range of options and developments; the pros and cons.

14 - 15 March 2007 London, United Kingdom

---

## EIA 2007: Racing Into the Future of Environmental Solutions

The Annual EIA Conference is the gathering place for professionals in asbestos management, mold identification and remediation, lead-based paint abatement, environmental sampling and analysis, indoor air quality, regulatory compliance audits, environmental site assessments, and environmental management systems. EIA 2007 continues that tradition in its 24th year presenting a comprehensive conference designed to encourage information exchange between various professionals dealing with environmental problems and to provide workable, cost-effective

17 - 21 March 2007 Charlotte, North Carolina, United States

---

## Recycling & Waste Management

First International Specialized Recycling & Waste Management Saudi Arabia Exhibition 2007 at Riyadh Exhibition Center.

17 - 20 March 2007 Riyadh Riyadh, Saudi Arabia

---

## ICSW 2007

The Twenty-Second International Conference on Solid Waste Technology and Management

18 - 21 March 2007 Philadelphia, PA, United States

---

## The 22nd International Conference on Solid Waste Technology and Management

Researchers, educators, government officials, students, consultants, managers, community leaders, and others with expertise in solid waste are invited to submit papers

for oral presentation at the Conference. Participants are expected from 40 countries. To submit an abstract for oral or poster presentation, [click here](#) . For a printable version of the Call For Papers that can be posted, [click here](#) .

18 - 21 March 2007 Philadelphia, PA,, United States

---

### [Americana 2007](#)

The International Environmental Technology Trade Show and Conference, 7th biennial Edition.

20 - 22 March 2007 Montréal, Canada

---

### [14th ETRA Conference on Tyre Recycling](#)

ETRA, the European Tyre Recycling Association, is the only European organisation devoted exclusively to tyre and rubber recycling. The 14th annual ETRA conference will include speakers representatives of Parliament, the Commission and other EU bodies well as tyre recyclers, material users, research and development teams from the Member States and beyond.

21 - 23 March 2007 Brussels, Belgium

---

### [The 7th International Automobile Recycling Congress \(IARC 2007\)](#)

International Congresson Automobile Recycling

21 - 23 March 2007 Amsterdam, Netherlands

---

### [China Eco Expo](#)

China Eco Expo is a major trade show and conference dedicated to showcasing international technology, products and expertise to be used in China's great move towards a sustainable economy. China Eco Expo is sponsored by the highest ministries and agencies of the Chinese government. It is an historic opportunity for international companies to establish or expand their share of the world's largest and fastest growing environmental market

04 - 06 April 2007 Beijing, China, People's Rep.

---

#### **CANECT 2007: Canadian Environmental Conference & Tradeshow**

Since 1992, CANECT has been the foremost event for Canadian environmental managers, plant personnel, government policy-makers, lawyers and consultants with responsibilities for environmental affairs...

16 - 17 April 2007 Toronto, Ontario, Canada

---

#### **Waste Conference "Waste matters. Integrating views"**

International conference 2nd BOKU, Institute of Waste Management at the BOKU - University of Natural Resources and Applied Life Sciences Vienna, Austria

16 - 19 April 2007 Vienna, Italy

---

#### **Recycling & Waste Forum 2007**

letsrecycle.com Live! is proud to present the Recycling & Waste Forum 2007, an exciting two-day event that combines seminars, workshops and a themed dinner. The inaugural event, which has already attracted widespread interest from all parties involved in the

waste and recycling sectors of the industry, will offer extensive networking opportunities for decision makers, corporate partners and sponsors

18 - 19 April 2007 Birmingham, United Kingdom

---

#### **Sep - Eco technologies exhibition**

The great international event dedicated to public services, anti-pollution technologies in productive processes, city management and energy. Simultaneously, study days, an opportunity for operators to update their knowledge, are held on the most significant current themes in the sector

18 - 21 April 2007 Padua, Italy

---

#### **EPTEE 2007 - The 8th China International Environmental Protection Exhibition**

EPTEE 2007 (The 8th China International Environmental Protection Exhibition) is an outstanding opportunity to present your company exhibits and services to experts from the industrial, trade and service sectors and to turn promising contacts into new business. International and Chinese entrepreneurs and those in charge of environmental protection in public agencies meet at this networking platform ...

27 - 29 April 2007 Shanghai, China, People's Rep.

---

#### **IEEE International Symposium on Electronics and the Environment**

This Symposium is a premier international forum for presenting environmental topics pertinent to engineers, managers and others engaged in research, development, manufacturing, recycling, and marketing of electronic products.

07 - 10 May 2007 Orlando, Florida, United States

---

### 15th European Biomass Conference & Exhibition, Berlin 2007

The 15th European Biomass Conference & Exhibition - From Research to Market Deployment - Biomass for Energy, Industry and Climate Protection will take place in Germany in the International Congress Center Berlin (ICC Berlin), Europe's largest conference venue, named top in the category "World's leading Conference & Convention Centre 2005".

07 - 11 May 2007 Berlin, Germany

---

### Ninth In Situ and On-Site Bioremediation Symposium

The Preliminary Program lists the 525 platform and poster presentations scheduled as of November 30, 2006, in 45 technical sessions, chaired by leaders in bioremediation research and application. Presentations will cover the major themes in bioremediation today, including such topics as remediation of soil, groundwater, sediments, and landfills contaminated by metals, PAH, PCBs and dioxins, nitrates, energetics, perchlorates, chlorinated solvents, and petroleum products and additives; bioaugmentation and biostimulation to enhance intrinsic microbial processes; phytoremediation; bioremediation used in concert with physical/chemical processes; and regulatory and public perception issues

07 - 10 May 2007 Baltimore, Maryland, United States

---

### Waste Expo 2007

WasteExpo is North America's largest solid waste and recycling tradeshow serving both

the private and public sectors

08 - 10 May 2007 Atlanta, Georgia, United States

---

### Waste to energy

The worldwide only exhibition on energy recovery from waste and biomass opens its doors for the third time. "waste to energy" in Bremen once again offers an international forum for the presentation of innovative technologies and the comprehensive and critical discourse on current issues

09 - 10 May 2007 Bremen, Germany

---

### SWANA's 15th Annual North American Waste-to-Energy Conference (NAWTEC)

Co-sponsored by SWANA, the Integrated Waste Services Association (IWSA), the American Society of Mechanical Engineers (ASME), and in partnership with the Waste-to-Energy Research and Technology Council (WTERT) at Columbia University - the North American Waste-to-Energy Conference (NAWTEC) is widely recognized as the LEADING industry conference and trade show covering municipal WTE issues, combustion concepts, and RD&D initiatives concerning new types of waste-conversion technologies.

21 - 23 May 2007 Miami, Florida, Italy

---

### Eco Summit 2007

This Eco Summit will focus on integrative aspects of all ecological science and its application under the general theme of "Ecological Complexity and Sustainability: Challenges and Opportunities for 21st-Century's Ecology". The aim of this Eco Summit is

to encourage a greater integration of both the natural and social sciences with the policy and decision-making community to develop a better understanding of the complex nature of ecological systems. This understanding will provide the basis for sustainable solutions to environmental problems

22 - 27 May 2007 Beijing, China, People's Rep.

---

### [WasteTech](#)

The 5th International Trade fair and Congress On Waste management, Recycling and Environmental Technologies The leading biennial waste management, recycling and environmental technologies show/congress in Russia/CIS established since 1999. Actual data of 2005 - 288 exhibitors, including 102 - international; 3011 sq.m of exhibits, 600 congress delegates, 5400 trade visitors. 200...more

29 May - 01 June 2007 Moscow, Russia

---

### [CET'07](#)

International Conference on Environmental Investment and Cooperation and "CET'07-1st Environmental Technologies Fair" shall be organized under the body and the support of the Ministry of Environment and Forestry in order to search, detect, coordinate and implement all the main thematic strategies in the field of environmental.

05 - 09 June 2007 Kocaeli, Turkey
