[Economical and efficient production of energy from municipal waste or sludge](#)

A Polish SME active in the area of waste management and environment has developed a new technology for safe and clean waste utilisation with the option of energy production. The SME is looking for cooperation in shape of license agreement, commercial agreement with technical assistance or technical co-operation. (Ref: 08 PL SPIM 0K2H - 19/03/2008)

[Hydrogen production by bioethanol steam reforming](#)

A Spanish university is working in hydrogen synthesis from bioethanol steam reforming. Bioethanol can be obtained by fermentation of biomass resources. Therefore, bioethanol steam reforming would contribute to net-zero carbon dioxide emissions. The research group is looking for companies interested in technical cooperation. (Ref: 08 ES MADG OJZ4 - 10/03/2008)

[Decomposition of keratin-containing waste \(nail, hair and feather\)](#)

The offering client is a Hungarian research institute. The offer is a microbiological method to decompose keratin (the main protein component of feather, nail and hair)-containing waste. It gives a new, environmentally friendly, final method to decompose keratin from the waste of meat-processing factories or poultry- and feather-processing factories. The institute offers the know-how of this microbiological method. (Ref: 08 HU
