Featured Company

Vecoplan

World Wide - World Class

Vecoplan Maschinenfabrik GmbH & Co. KG

Technical solutions by Vecoplan for shredding, separating, recycling and storage of waste are exemplary innovations taking top place in a world wide market.

Vecoplan was founded in 1969 and the company progressed quickly to a nationally and internationally recognized machine producer.

Featured Events

10th European Lead Battery Conference

10ELBC brings together key technical, manufacturing, marketing and R&D personnel to discuss and examine the strategic, technical and commercial issues of greatest importance to the industry today.

26-29 September 2006 , Athens, Greece

POLLUTEC 2006

The key global meeting for environment professionals, Pollutec Lyons brings together 2,400 exhibitors covering a range of sectors, equipment, technologies and services and 65,000 industrialists, local authority managers and specifiers for 4 days of outstanding business opportunities.

**22nd International
exhibition
of environmental
equipment, technologies
and services**

28 November-01 December 2006 , Lyon, France

Sep - Eco technologies exhibition

The great international event dedicated to public services, anti-pollution technologies in productive processes, city management and energy. Simultaneously, study days, an opportunity for operators to update their knowledge, are held on the most significant current themes in the sector

**APRIL'07
Padua**

18-21 April 2007 , Padua, Italy

Latest News

[UK: WRAP Allocating Funding for C&D Materials](#)

20/09/2006 (recyclingtoday.com)

The Waste & Resources Action Programme has kicked off a new capital support competition to encourage the increased recovery and recycling of construction and demolition materials. The aim of the Construction Waste Recycling Infrastructure Capital Support Programme is to stimulate a step change in the collection, segregation, recovery and recycling rates of materials and, in particular, non-aggregate materials, arising from construction and demolition sites in the UK.

Boston Considers Recycled Sidewalks

20/09/2006 (recyclingtoday.com)

An initiative has been presented to the Boston City Council proposing that the city begin installing sidewalks made from recycled tires instead of concrete, according to a report in the Boston Globe. Supporters say using the rubberized material will make sidewalks less prone to cracking because of encroaching tree roots...

Tire Recycling Business Summit: Rolling Ahead

20/09/2006 (recyclingtoday.com)

Attendees of The Tire Recycling Business Summit, hosted by the Institute of Scrap Recycling Industries Inc. (ISRI) in Rosemont, Ill., in September, heard good news concerning many of the end markets into which they sell their products. In a presentation on the topic of end markets, Dennis Glenn of Energis LLC, Little Elm, Texas, portrayed the cement kiln market for tire-derived fuel as an active and growing one...

[EU Seeks Input on Metals in Europe](#)

20/09/2006 (recyclingtoday.com)

The European Commission, which is recognizing the changing dynamics of the European metals industry, is seeking comments from metals-related companies and groups to help craft future policy options in the fields of waste, energy, trade and research...

[UK: Planning approval for £25m East London gasification plant](#)

19/09/2006 (Letsrecycle.com)

Thames Gateway planners voted unanimously last night to approve planning permission for a new technology waste treatment plant in Rainham. Storm clouds gathered over Stratford Old Town Hall as last night's committee hearing threw out objections from residents...

[Veolia considers providing WEEE services](#)

19/09/2006 (Letsrecycle.com)

Waste management company Veolia is considering offering compliance services for electronics producers affected by the Waste Electrical and Electronic Equipment Directive. The company may also look to build its own treatment facility and market itself as a "closed loop" compliance provider as new producer responsibility rules on waste electronics come into force next year...

[Uk: "Major change" predicted for wood recycling industry](#)

19/09/2006 (Letsrecycle.com)

The Wood Recyclers' Association has predicted a "major step change" to wood recycling following efforts by the Environment Agency to reclassify recycled wood as a "non-waste"...

[UK: Protocol hailed as major step forward for composting](#)

19/09/2006 (Letsrecycle.com)

A quality protocol developed by the Environment Agency and WRAP will see composters making a product that is not classified as waste - as long as they keep to production criteria which includes meeting publicly available standards... See also: [edie.net](#)

[Germany - Austria - Biogas Study Excursion](#)

13/09/2006 (Knoten Weimar newsletter)

The Internationales Biogas und Bioenergie Kompetenzzentrum IBBK (International Biogas and Bio Energy Centre) is extending invitations to the BIOGAS study excursion 2006 through southern Germany and Austria (30.9.-6.10.) for beginners, professionals and decision-makers. See attachment or

[Islands of the World - Waste Crisis](#)

13/09/2006 (Knoten Weimar newsletter)

Up to 96 percent of the waste from the island states in Europe, the Caribbean, the Atlantic, Pacific and Indian Ocean is disposed of at inadequate dumping areas.

Alternatives are being urgently sought. The international research organisation World Island Network (WIN) wants to promote joint solutions and has collected primary data from 65 island networks in the world.

Global Scrap Paper Report Issued

13/09/2006 (recyclingtoday.com)

Moore & Associates, Atlanta, in conjunction with EU Consulting, has announced the availability of the 2006 edition of its "Outlook for Recovered Paper Markets – Increasing Competition for Recovered Paper" report. The fourth edition of the strategic business analysis focuses on future trends and developments in the use and supply of recovered paper, according to William P. Moore, one of the report's co-authors

European Consortium Acquires German Metal Recycler

13/09/2006 (recyclingtoday.com)

A group of mid-sized family owned companies have combined to acquire TSR Group, a Germany-based company that specializes in recycling of ferrous and nonferrous metals. The companies acquiring TSR include Remondis AG, which has a 60 percent stake in the acquisition; Cronimet, 20 percent; and Alfa Acciai, 20 percent...

UK to develop compost-from-waste guidelines

12/09/2006 (endseuropedaily.com)

The Anglo-Welsh environment agency is developing guidelines on when compost produced from discarded biological material can be reclassified as a product rather than a waste. The move anticipates and is likely to influence similar criteria being developed by the European commission for EU-wide application....

[French government defends incineration policy](#)

12/09/2006 (endseuropedaily.com)

The French government has defended its waste policies after it was urged by environmentalists and two former environment ministers to abandon waste incineration and concentrate more on waste reduction. Environment minister Nelly Olin denied claims made during an annual anti-incineration campaign last week that French waste incinerators pose a threat to public health and the environment...

[UK: Defra launches investigation as PRN market flounders](#)

08/09/2006 (letsrecycle.com)

Defra has launched a snap investigation of the packaging waste producer responsibility system in the UK. The move comes after the packaging waste recovery note (PRN) market – the financial mechanism of packaging producer responsibility – collapsed last month...

[UK: World's first" plant to recycle used plastic milk bottles back into new plastic bottles](#)

08/09/2006 (letsrecycle.com)

Contracts to build the "world's first" plant to recycle used plastic milk bottles back into new plastic bottles could be agreed by Christmas. That is the hope of WRAP, the Waste and Resources Action Programme, which is offering to fund up to 30% of the new recycling plant...

[UK Agency Offering Money for Gypsum Recycling Projects](#)

06/09/2006 (recyclingtoday.com)

The Waste & Resources Action Programme is soliciting bids from companies that can provide research on finding potential uses for recycled gypsum in the manufacture of cement...

University Researching Recycling of LCDs

06/09/2006 (recyclingtoday.com)

Scientists at the University of York, a British University, are involved in research aimed at resolving the problem with discarded liquid crystal displays. LCDs are included in calculators, cell phones and television sets. However, LCDs contain potentially hazardous materials. However, research initiative provides a real opportunity to harness the world class expertise that we possess in the UK and direct it towards the task of wealth creation"...

Bulgaria issues plan to cut biowaste dumping

05/09/2006 (endseuropedaily.com)

The Bulgarian environment ministry has released a draft strategy on cutting biodegradable waste dumping. The plan includes the introduction of separate collection for biowaste and the construction of mechanical and biological treatment (MBT) plants...

Draft Strategy for reduction of municipal biodegradable waste going to landfill

China targets recycling ahead of BIR's momentous visit

01/09/2006 (environmental-expert.com)

For the first time ever, the BIR world recycling body is to hold one of its twice-yearly conventions in China. This is already being flagged as a landmark event in the development of China's raw materials industries and policy-making bodies...

[Understanding RoHS - What it Means to U.S. Manufacturers](#)

01/09/2006 (environmental-expert.com)

With the Restriction of Hazardous Substances (RoHS) regulations scheduled to take effect in July 2006, there is ongoing concern regarding the readiness of American companies to meet new European standards...

[Latest TO/TR \(Technology Offers / Technology Requests\)](#)

[New high-tech sorting system based on spectral imaging](#)

An Austrian company developed a high-tech sorting system working with light (near-infrared NIR and visible VIS). The system identifies, classifies and sorts domestic, commercial and industrial waste reliably and automatically within seconds. The system is based on spectral imaging consists of a lighting element, a dark room using spectroscopy, a control cabinet with software and a sorting jet. The company is looking for partners for commercial agreements with technical assistance. (Ref: 05 AT ATAP 0CQX - 01/09/2006)

[Removal of heavy metals from the technological waste waters by sulphate](#)

reducing bacteria

One of the Slovak research institutes has developed a new technology based on the natural activities of sulphate reducing bacteria (the mechanism of extra cellular precipitation), the products of which are easily removable sulphides of metals with a small dissolving power. They are looking for partners for joint venture agreement, license agreement or marketing agreement. (Ref: 06 SK SKBB 0G2G - 28/08/2006)

Recycling of drilling emulsions and lubricants from metal processing

A German SME has developed a technology for on-site recycling of drilling emulsions and lubricants from metal processing. The separation of lubricants, emulsions, chips and metal sludge, respectively, is achieved by using a mobile, low-weight separator equipped with skimmers and pumps. Circulation rates of typically between 20 and 200 dm³ per hour are achieved. The company is seeking licenses and marketing of the technology in other countries. (Ref: 06 DE DSTA 0GOV - 18/08/2006)

An Innovative Cutting Edge Waste Disposal, Containment & Transportation Technology

A Maltese technology developer has produced an innovative concept consisting of a sealed waste storage device as well as a complimentary recovery vehicle and waste recovery strategy. Its main objective is to eradicate shortcomings in conventional waste recovery and transportation methods. The company is looking for waste management contractors or providers for waste management technologies who seek innovative solutions to meet environmental & urban requirements. (Ref: 04 MT NRME 0AUC - 16/08/2006)

Novel rubber recycling technology, which converts rubber wastes (mainly tyres) into high-quality raw rubber material that can replace virgin rubber

An Israeli SME possesses a novel technology for rubber recycling using a de-vulcanisation technique. The recycling process is cost-effective, simple to implement and 100% environmentally friendly (no dangerous chemicals are used and no hazardous waste is emitted as a result of the process), producing high-quality recycled rubber. The company is looking for European partners from the rubber/recycling industries to form a strategic joint venture. (Ref: 05 IL ILMI OC1E - 16/08/2006)

Next Events

European Paper Recycling Conference

The European Paper Recycling Conference offers recovered paper merchants, brokers, consumers, mill representatives and equipment and service providers involved in the paper recycling industry an important forum to network with industry colleagues and discuss the latest market trends.

25 - 26 September 2006 Barcelona, Spain

Landfill Allowance Targets: Bio-ways to Meet Yours

This one-day seminar will provide you with information and ideas to help you make informed decisions about how your local authority will reach its challenging targets for diverting biowaste from landfill.

26 September 2006 Croydon, United Kingdom

RecAsh 2nd International Seminar 2006

RecAsh is a Life-Environmental-project The seminar objectives are to present: - up-to-date scientific information about element budgets for whole-tree harvesting, beneficial and negative effects of ash recycling - practical experiences from experimental and commercial forest fuel extraction and wood ash recycling activities - results and experiences gained within the RecAsh project on how regular recycling of wood ash may be organised with respect to ecological, technical, economic, logistic, legal and administrative aspects and frames...

26 - 28 September 2006 Karlstad, Sweden

10th European Lead Battery Conference

10ELBC brings together key technical, manufacturing, marketing and R&D personnel to discuss and examine the strategic, technical and commercial issues of greatest importance to the industry today.

26 - 29 September 2006 Athens, Greece

Procuring Recycled Paper: Free seminars

Recycling Action Yorkshire (RAY) and the Waste & Resource Action Programme (WRAP) are running a series of free seminars for the education, public and private sectors in the Yorkshire and Humber region. The events will introduce the benefits of procuring paper with recycled content and explain how by doing so, these organisations can enhance their

reputation and reduce their impact on the environment

27 September - 10 October 2006 Leeds, United Kingdom

Anaerobic Biological Waste Treatment

The 5th professional symposium "Anaerobic Biological Waste Treatment" in Dresden addresses: legal foundations, processing technology developments, research results, energy use, plant security and examples from the field. Firms can present themselves as part of an exhibition. The organisers of the event: Technische Universitaet Dresden, Fachhochschule Trier, Technische Universitaet Hamburg-Harburg and Technische Universitaet Muenchen.

27 - 28 September 2006 Dresden, Germany

Biodiesel in London: meet the suppliers

This enhance event will provide information on the suitability of biodiesel as a replacement for petro-diesel, giving information on how you can use it and who you can buy it from in London...

28 September 2006 London, United Kingdom

Green Awards

The Green Awards 2006 is a new, and unique, inspiring national event that will showcase the value of sustainable development through powerful communications and marketing strategies. The awards will spotlight brands or organisations that have demonstrated their commitment to these issues in a creative way, across different media platforms and

marketing disciplines.

29 September 2006 London, United Kingdom

[ISWA Annual Congress 2006](#)

The Congress tells the stories on how countries, municipalities and industries in time have adapted and developed according to the new demands and targets placed upon the modern waste management systems. The Congress discusses the future needs for decision – making models in a world of complexity, where means of sustainability are being questioned. Programme (pdf)

01 - 05 October 2006 Copenhagen, Denmark

[Eventful Scotland, 5th Annual Conference](#)

Eventful Scotland, the partnership facilitated by The Chartered Institution of Waste Management (CIWM), Scottish Environment Services Association (SESA), Scottish Environment Protection Agency (SEPA), Caledonian Environment Centre (CEC) and Keep Scotland Beautiful (KSB) is holding a two day conference and indoor exhibition dedicated to facing the waste and recycling industry in Scotland.

03 - 04 October 2006 Glasgow, Scotland, United Kingdom

[EnergyExpo-2006](#)

11th international exhibition of energy and ecology. The purpose of the exhibition is to demonstrate cutting-edge equipment for electric and heat energy generation and distribution, energy saving and environment friendly technologies, means and systems of automation, information technologies for energy industry, environment protection, civil

engineering and other branches.

03 - 06 October 2006 Minsk, Belarus

15th PROMA International Environment Fair

The ambitious program of parallel events includes the 10th Environmental Engineering Congress, the 5th Technology Transfer Encounters, the 4th Latin-American Environmental Encounters and the 2nd Iberian Congress on the future of Recycling, making PROMA 2006 the ideal forum for environmental research, for technological advances in cleaner production and for environmental business affairs.

03 - 06 October 2006 Bilbao, Spain

Recycling & Waste Reduction in Ohio: 4th Annual Partners Conference

2 1/2 day conference offering educational sessions on solid waste and recycling issues in the state of Ohio. Also includes a trade fair, networking opportunities and an awards ceremony. Conference partners include Assoc. of Ohio Recyclers, Keep Ohio Beautiful, ODNR, Ohio epa, Organization of Solid waste Districts of Ohio and SWANA Buckeye Chapter.

03 - 05 October 2006 Dayton, Ohio, United States

Complying with the WEEE Directive

Complying with the WEEE Directive is a one-day conference that will cover new ground. You have been inundated with WEEE conferences over the past couple of years, so what makes this event any different? For a start, Central Government departments including

the DTI and Environment Agency will be divulging new advice and guidance that will only be available at this conference. Add to that unique case studies and presentations from some of the biggest players in the market, and you can see that this really is an event you must attend.

05 October 2006 The Oval, London, United Kingdom

6th International Trade Fair for Environmental Protection and Municipal Technology

The fair focuses on environmental protection (potable water quality, wastewater sewage and treatment, flood protection, air protection and solid waste management systems).

10 - 13 October 2006 Budapest, Hungary

Toward sustainable production and consumption

A seminar organised by the PEER network (Partnership for European Environmental Research) with participation of the European Commission.

11 - 12 October 2006 Montpellier, France

The transport of waste and recyclables

London Remade is hosting its fourth local authority networking event focusing on the transport of waste and recyclables on 16 October. The event will take place at the Institute of Physics in central London from 2 – 5 pm and is expected to be attended by over 150 delegates.

16 October 2006 London, United Kingdom

The Fakuma international trade fair for plastics processing

The Fakuma started out a very high level right from the start in 1981, demonstrating concentrated specialised competence and providing experts with outstanding contacts and information. Friedrichshafen, located where Switzerland, Austria and Germany converge on one another, provides the Fakuma with an ideal trade fair location. In general, the Fakuma is distinguished by broad-based offerings including processing machinery and suitable peripherals, raw materials and applications, as well as automation solutions, control technology and much more

17 - 21 October 2006 Friedrichshafen, Germany

WEEE Regulations - Are we ready?

The UK has missed the Waste Electrical and Electronic Equipment (WEEE) Directive's legal implementation deadline of 13 August 2005. Instead the Government has decided to implement the WEEE Directive's producer responsibility and retailer take-back obligations later in 2006, in order to ensure adequate collection infrastructure is in place. This CIWM seminar will bring together all the key stakeholders to examine the forthcoming regulations and assess what progress is being made in the build up to delivering the directive's requirements.

17 October 2006 Cardiff, United Kingdom

E-Scrap 2006

E-Scrap 2006 will feature extensive and detailed industry assessments, including analyses of stewardship systems and trends in the U.S. and Canada, e-scrap collection issues, recycling market factors, and legislative and policy considerations.

18 - 19 October 2006 Austin, Texas, United States

Deriving Energy from Waste

This top-level event will assist you in your drive to divert municipal waste from landfill, maintain your recycling levels and reduce carbon emissions. It will detail funding options and how to generate valuable heat and electricity along the way.

19 October 2006 The Oval, London, United Kingdom

National Recycling Coalition congress and exposition

The Annual Congress & Exposition is NRC's annual education and networking event and is considered the premiere national event for recycling professionals

22 - 25 October 2006 Atlanta, Georgia, United States

Biowaste- Compost - Soil 2006

The event is designed to demonstrate and teach with the help of international experts from best practice examples and success stories under the motto "From the practice for the practice", to exchange experiences, to start networking and offers a unique possibility to share the lessons that have been learned in 20 years decentralised biowaste management and composting. So the event is especially dedicated to decision makers, investors, politicians and experts in the enlarged EU and the acceding candidate countries.

24 - 26 October 2006 Landhaus St. Pölten, Lower, Austria

PLASTUKRAINA 2006

International Fair of Plastics Processing. Technologies, Equipment and Machines for Plastics Processing, Packaging, Industrial Design, Plastics, Rubber Processing, Recycling
24 - 26 October 2006 Kiev, Ukraine

Entsorga-Enteco

International Trade Fair for Waste Management and Environmental Technology. The new Entsorga-Enteco will cover the entire value chain for waste management and environmental technology.

24 - 27 October 2006 Cologne, Germany

FEAD Annual Conference

FEAD Annual Conference: FEAD is the European Federation which represents the European waste management industry. Members are national waste management associations, which have an approximate 60% share in the household waste market and handle more than 90% of industrial and commercial waste in Europe, with a collective annual turnover of € 50 billion...

26 October 2006 Cologne, Germany

Quarry & Recycling Show

The North American Quarry & Recycling Show is committed to providing a unique opportunity for those involved in the Aggregates, Concrete & Asphalt Recycling, HMA and Recycling Concrete Industries. This is a targeted show that will draw quality attendees

from North America and beyond.

26 - 28 October 2006 Atlanta, GA, United States

Eco Expo Asia 2006

In this first ever event of its kind in Hong Kong, Eco Expo Asia will be an ideal marketing platform for a wide range of products and services relating to environmental protection.

The trade fair will offer something for everyone, from national governments to individual consumers looking for ways to become more environmentally-friendly on a day-to-day basis.

27 - 30 October 2006 AsiaWorld-Expo, Hong Kong

Efficient Management of Wastewater, its Treatment and Reuse in the Mediterranean Countries (EMWater)

The conference will foster the exchange of experience and present the state-of-the-art on issues such as low-cost technologies, operation and management of wastewater treatment plants, decentralisation of wastewater treatment, ecological sanitation and wastewater reuse.

30 October - 01 November 2006 Amman, Jordan

Biogas Markets

Listen, Question and Exchange Ideas with Experts from 17 Countries; Network with Participants from Across the Value Chain; Understand Global Biogas Trends and Business Opportunities plus: Waste-to-Energy, 1st November 2006, a one day seminar focussing

on implementing profitable waste-to-energy solutions

30 - 31 October 2006 Vienna, Austria

BIR Autumn Convention

Bureau of International Recycling Autumn Convention

30 - 31 October 2006 Brussels, Belgium

Eco-products International Fair 2006

The event is organised by the Asian Productivity Organization (APO), SPRING Singapore, and Waste Management and Recycling Association of Singapore (WMRAS) and co-organised by the National Environment Agency (NEA), Public Utilities Board (PUB), and Singapore Water Association (SWA). The EPIF06 and conference will be the authoritative networking platform for the government and municipal authorities, private sector, manufacturers, consultants, industry players, and other qualified decision makers in the Asia Pacific region with a strong emphasis on environmental development, products, and services.

31 October - 02 November 2006 Suntec, Singapore

Beyond Recycling 06

The first Beyond Recycling conference (held in 2003) was a sell-out, providing a very popular opportunity for local authorities, community groups, central government representatives and others to exchange practical approaches to municipal waste prevention. Now in 2006 we'll not only be taking a fresh look at waste prevention, but

also how to make the case for cost-effective waste prevention, at all levels, in practice and in policy.

02 November 2006 Dorchester, Dorset,, United Kingdom

Resource efficiency and waste management - achieving sustainable waste practices

With prominent speakers from the waste and construction industry, this conference will take a strategic look at managing waste and will provide practical guidance on how to achieve sustainable waste practices through a series of seminars and workshops. Plenary sessions will analyse the past and current environmental performance of the construction industry, which will enable delegates to benchmark their company performance against industry performance.

07 November 2006 London, United Kingdom

WASMA 2006

The 3rd international forum for waste management

07 - 10 November 2006 Moscow, Russia

Ecomondo 2006

ECOMONDO strengthens its leadership for the entire waste recovery cycle, sustainable energy, water recycling, reclamation, air quality and risks and safety.

08 - 11 November 2006 Rimini, Italy

Energia International Expo 2006

The unique Exhibition & Forum in Greece, under the auspices of the Greek Ministry of Development, exclusively on Energy Products, Technologies & Processes download the brochure

09 - 12 November 2006 Athens, Greece

7th Annual NSW Waste Management Conference & Expo

The 7th Annual NSW Waste Management Conference & Expo provides an exciting opportunity for you to showcase your unique products and services alongside your competitors. Presented by the NSW Branch of the Waste Management Association of Australia (WMAA), this combined Conference and Expo will attract major stakeholders from State and Local Governments, operators, industry, environmental consultancies, collectors, recyclers, transporters, researchers, manufacturers, designers, generators, educators and community groups.

13 - 15 November 2006 Sydney, Australia

11th European Biosolids and Organic Resources Conference, Workshops & Exhibition

We now move into the second decade of this successful conference and it is a fitting time therefore to introduce a number of changes to ensure that it remains topical for a further decade. The first change is in the title of the event itself which has been broadened to encompass organic resources within its remit. It is perhaps true to say that in the environmental area, legislative changes are one the biggest drivers for technology advances and the past few years have been relatively quiet with regards to legislation that impacts directly on biosolids...

13 - 15 November 2006 Wakefield, United Kingdom

World Recycling Forum - Shanghai '06

International Conference & Exhibition on Car, Electronics and Battery Recycling

14 - 17 November 2006 Shanghai, China, People's Rep.

ENVIRONMENT 2006

8th International Environmental Engineering and Technology Fair.

15 - 17 November 2006 Tallinn, Estonia

LARAC 2006

The Local Authority Recycling Advisory Committee is delighted to present this year's LARAC Conference 2006 Packed with a superb line-up of expert speakers from some of the recycling world's key organisations, LARAC Conference 2006 is THE essential recycling event for you. The conference includes numerous case studies from some of the most inspirational local authorities in the UK, to help you strengthen and advance your recycling and waste management strategies.

15 - 16 November 2006 Bournemouth International Centre, United Kingdom

Entech India 2006

South asia's only international exhibition & conference on environmental technology & renewable energy

16 - 18 November 2006 Mumbai, India

European Bioplastics Conference 2006

The First European Bioplastics Conference is being organised by European Bioplastics, the representation of the European Bioplastics Industry. The association comprises companies from the agricultural feedstock, chemical and plastics industries, together with industrial users and recycling companies. The high level two day conference will be the event of the year for the European bioplastics industry. Attendees will be representatives from the industry and related areas. Politicians and media representatives will be our invited guests.

21 - 22 November 2006 Brussels, Belgium

Austria - Waste Management Conference

From November 22nd through 24th, 2006 representatives from the scientific world and business are meeting for the eighth time at the DepoTech in Leoben, Germany. The focus: waste and landfill technology, contaminated sites and sustainable waste management. Practical experience or scientific work is welcome as lecture or poster. Deadline for the submission of papers is February 28th, 2006.

22 - 24 November 2006 Leoben, Germany

Depotech 2006

With more than 400 participants DepoTech has developed into Austria's biggest waste management conference. The up-to-date topics, the quality of the lectures, the organizational set-up have contributed to DepoTech's reputation far beyond Austrian borders. Already for the eighth time, representatives from science and industry will meet

between November 22 and 24 to discuss current topics on waste management and technology. The conference will focus on waste management, waste- and landfill technology and contaminated sites.

22 - 24 November 2006 Montanuniversität Leoben, Austria

Waste Facilities Audit Association (WFAA) Annual Conference

The Waste Facilities Audit Association - WFAA is a non-profit making association of companies who in the course of their normal business activities generate waste. The WFAA was formed in 1993 principally in response to tightening legal environmental requirements, increased cost of waste disposal and increased public and corporate expectation.

27 - 28 November 2006 Ware, Hertfordshire, United Kingdom

Designing and Recycling Electrical and Electronic Equipment 2006

ERA Technology is pleased to announce that its flagship annual conference, Designing and Recycling Electrical and Electronic Equipment. The event will provide a forum for discussion of best practice and is an ideal complement to ERA's suite of products and services aimed at ensuring the safe and successful route to compliance with the EuP, WEEE and RoHS directives.

28 - 29 November 2006 Gatwick, United Kingdom

POLLUTEC 2006

The key global meeting for environment professionals, Pollutec Lyons brings together

2,400 exhibitors covering a range of sectors, equipment, technologies and services and 65,000 industrialists, local authority managers and specifiers for 4 days of outstanding business opportunities.

28 November - 01 December 2006 Lyon, France

CWRE 2006 - Canadian Waste & Recycling Expo

As the nation's only tradeshow serving this multi-billion dollar industry, CWRE will continue to focus on the collection, hauling, processing and disposal of waste.

29 - 30 November 2006 Toronto, Ontario, Canada

ECOMA 2006

ECOMA (ECO-MANufacture) is the only Show & Conference to support corporate management coexisting with environment within the manufacturing industry, in Japan. Firstly held in November 2004 at PACIFICO YOKOHAMA, secondly held within INCHEM TOKYO 2005 in November 2005 at Tokyo Big Sight, and again, the third ECOMA will be held in PACIFICO YOKOHAMA expanding its scale.

29 November - 01 December 2006 Pacifico Yokohama, Japan

The Composting Association's Annual Conference & Exhibition

2013 is a key date for everyone involved in composting. It might seem like it's in the distant future but in order for you to achieve your goals then you need to have the ground work in place now. On the way to 2013 there will be opportunities and threats for you to deal with and how it's how you manage these that will determine whether you will be successful in 2013. This conference is your guide to meeting challenges of 2013...

06 - 07 December 2006 Brighton, United Kingdom

[Global Waste Strategies Summit](#)

Global Waste Strategies Summit 2006 will bring together the most advanced waste technologies and waste management best practices from around the world, to address key questions for UK local authorities on achieving waste targets.

11 - 12 December 2006 London, United Kingdom

[6th International Electronics Recycling Congress](#)

The 6th International Electronics Recycling Congress will be held in the congress center of Hamburg. A special exhibition area will be set up for companies wishing to display their products or advertising materials.

17 - 19 January 2007 Hamburg, Germany
