Sponsorship Opportunity

Annual Sponsorship - Offer

Take advantage of this exciting opportunity ! Promote – from now to the end of 2007 - your company's products and services by sponsoring at Wastexchange.eu and at the most important Italian waste management exhibitions and educational events. Enter the Italian and the international market using the best gate.

Pay Attention: This is a special offer and it's limited to the first twenty companies that will subscribe it.

[Download our Offer](#) | [Contact us for more information](#)

Featured Company

ESP (Environmental Software Providers)

ESP provides software solutions that help companies manage environmental performance and risk from the facility level to the global enterprise level. Since 1992, ESP software has been helping companies track compliance, improve financial performance and manage corporate sustainability programs.

AXO Shredders

AXO Shredders is a world leading manufacturer of machinery specifically designed to suit the paper shredding and recycling industry.

Worldwide customers choose AXO machines because of the high throughput and reliability and the economic benefit these factors bring.

Featured Events

ECOMONDO 2006

ECOMONDO strengthens its leadership for the entire waste recovery cycle, sustainable energy, water recycling, reclamation, air quality and risks and safety.

08-11 November 2006 , Rimini, Italy

POLLUTEC 2006

The key global meeting for environment professionals, Pollutec Lyons brings together 2,400 exhibitors covering a range of sectors, equipment, technologies and services and 65,000 industrialists, local authority managers and specifiers for 4 days of outstanding business opportunities.

28 November-01 December 2006 , Lyon, France

Sep - Eco technologies exhibition

The great international event dedicated to public services, anti-pollution technologies in productive processes, city management and energy. Simultaneously, study days, an opportunity for operators to update their knowledge, are held on the most significant current themes in the sector

18-21 April 2007 , Padua, Italy

Padua**

Latest News

European Groups Raise Paper Recycling Target

05/10/2006 (recyclingtoday.com)

Members of the European Paper Recovery Council have agreed to support a new goal of increasing the paper recycling rate in Europe from the present level of 55.4 percent to 66 percent by 2010. The groups note that 46.6 million metric tons of paper and paperboard were recycled in Europe last year, and more than half of the paper used in Europe today is now made from recovered paper.

Alcan Announces Plan to Build Recycling Plant

05/10/2006 (recyclingtoday.com)

Alcan will build a \$180 million aluminum spent pot lining recycling plant in Quebec's Saguenay-Lac-Saint-Jean region. When complete the facility will be able to handle around 80,000 metric tons of recycle spent pot lining, residual material generated in the delining of pots following aluminum smelting electrolysis process.

UK: DTI call for early responses to WEEE consultation

02/10/2006 (letsrecycle.com)

The official responsible for ensuring the WEEE Directive is adopted by the UK has called on those affected by it to respond to the current consultation soon. The formal end to the consultation is October 17, but the DTI's director of sustainable development, Tony Pedrotti, yesterday urged stakeholders to respond before this date if possible...

UK: Bournemouth signs £7.5m waste contract with MBT firm

02/10/2006 (letsrecycle.com)

Bournemouth has signed a £7.5 million, five-year contract to send its residual waste to the New Earth Solutions mechanical biological treatment plant, near Poole. Under the contract, which could also include a three-year extension, New Earth will initially continue sending the borough's annual 70,000 tonnes of residual material to local landfills run by Biffa and Veolia...

UK: Wincanton and Valpak in electronics recycling double act

02/10/2006 (letsrecycle.com)

Producer responsibility compliance scheme Valpak has agreed a partnership with logistics and recycling firm Wincanton ahead of new WEEE regulations coming into force in January. The partnership will not rule out the companies working with other organisations to handle the requirements of Europe's Waste Electrical and Electronic Equipment (WEEE) Directive.

Biggest ever 'recycled' building comes to NY

02/10/2006 (edie.net)

Developers of a controversial commercial development in New York State have pledged to build the world's largest sustainable structure as part of their plans, using recycled materials and extensive energy efficiency measures in its construction.

UK: More efforts made to stop building site waste

02/10/2006 (edie.net)

WRAP is attempting to up recycling rates in the construction and demolition industries by offering financial backing to waste contractors wanting to take a slice of this growing sector.

India: Stricter rules for hazardous waste

02/10/2006 (hindu.com)

Bangalore - India: Industries generating hazardous waste have to now comply with stricter regulations notified by the Karnataka State Pollution Control Board. Among other measures, factories have to display large digital signboards at the gate indicating the quantity and nature of the hazardous waste generated. The industries have to follow the provisions of the Hazardous Waste (Management and Handling) Rules. This move complies with directions issued by the Supreme Court in connection with a public interest litigation.

Strengthened EU battery rules enter force

28/09/2006 (endseuropedaily.com)

New EU rules on batteries and battery waste entered force on Tuesday following publication in the bloc's official journal. Under the new directive, member states must meet a binding recycling target for general consumer batteries of 50% by 2010. By the same date, countries must achieve stricter recycling targets for lead-acid and nickel-cadmium batteries of 65 and 75% respectively. Minimum collection rates for used batteries are also set at 25% by September 2012, rising to 45% by September 2016. Follow-up : See the directive (reference 2006/66/EC), and European commission batteries pages...

Xstrata Building Recycling Plant

27/09/2006 (recyclingtoday.com)

Xstrata Nickel started construction of a new recycling plant at its Sudbury, Ontario, smelter. When complete, it will more than double the smelter's existing recycling capacity. The cost of the project is around C\$21.4 million (US\$19.4 million). When fully operational, Xstrata Nickel will become a market leader in cobalt and nickel recycling.

Plasco begins construction of plasma gasifier

27/09/2006 (solidwastemag.com)

Plasco Energy Group Inc. has begun construction on a commercial plasma gasification plant in the City of Ottawa, Ontario. The facility will demonstrate a technology that uses and electric arc to convert some 85 tonnes per day of municipal waste into syn gas. The process occurs in a sealed system that produces no air emissions. The syn gas will power engines to generate four megawatts of electricity (enough to power 4,600 households).

The process also produces a solid glass-like material that can be used in aggregate products.

[Industry demands clarity on by-products v waste](#)

25/09/2006 (endseuropedaily.com)

Industry representatives have called for more clarity on the legal status of by-products as part of the ongoing revision of EU waste legislation. Operators want waste streams that can be used as primary materials in other industrial processes to be reclassified as by-products, thus exempting them from strict waste management rules.

[See the Wastexchange.co.uk News Section](#)

Latest TO/TR (Technology Offers / Technology Requests)

[Active Filter Media that replaces sand in pressure and gravity filters](#)

A Welsh company is offering a recycled glass technology that not only physically removes solids from water and waste streams but also adsorbs waste chemicals and actively prevents bacteria from developing in filter beds. Potential users are brewers and food manufacturers, chemical processors, fish farmers, textile companies, pulp and paper producers, water and sewage treatment companies. Collaborative agreements are sought.

(Ref: 05 GB WADA ODGM - 06/10/2006)

[Highly efficient biological waste decomposition and humification](#)

A Slovenian company has developed a highly efficient humification of all kinds of

biological sludge. The process is technically undemanding & can be easily adapted. In the process the sludge reduces its volume, loses unpleasant smell and is pasteurised. The final product is highly active organic fertiliser which can be used for preparation of the vegetable growth substrates. The company is interested in licensing, joint venture, manufacturing, commercial, technical or other types of agreements.

(Ref: 06 SI SIJS 0FZN - 06/10/2006)

Eco Self-adhesive Label

An Irish plastics/packaging company has developed and patented a self-adhesive label that can be recycled with any polystyrene product or packaging. The main advantage of this technology is that it allows lower-cost items to be economically recycled. The labelling can be either pre printed or printed using thermal transfer methods. The company is seeking to license the concept to suitable partners.

(Ref: 06 IE IEEI 0G97 - 25/09/2006)

Roundbaling technology for all kinds of waste and agricultural rest products

A Hungarian small company offers a roundbaling technology for all kinds of waste and agricultural rest products. The technology offers advantages in terms of cost efficiency and environmental safety. The company is looking for industrial partners for a joint venture agreement.

(Ref: 05 HU HUTP 0DDF - 22/09/2006)

Device to separate post-consumer plastic material

A Department of the University of Trieste (Italy) has developed a device to separate and recover plastic material. Advantages over conventional methods are due to the physical process suitable for separating post-consumer plastic with small density differences. The University department is looking for any post consumer plastic industry which is interested in commercial agreement with technical assistance.

(Ref: 06 IT IRCR OFFO - 14/09/2006)

Expertise in techniques to extract metals from a solid or liquid waste

The Department of chemical engineering in a major London-based university has expertise in the design and optimisation of processes for treatment of effluents and waste containing a range of precious and base metals. Currently they are developing a process to recover metals, principally copper, from waste electrical and electronic equipment (WEEE). They are seeking industrial partners interested in research collaboration.

(Ref: 06 GB LDLT OG5K - 14/09/2006)

Solvent and spent acid recovery using innovative membrane technology

An Israeli SME has developed a novel solution for solvent recovery using an innovative pervaporation membrane in hollow fiber configuration which greatly improves the economics of solvent recovery and provides an efficient, cost effective and environmentally friendly solution. The unique membranes can also be used for the recovery of spent acids by diffusion dialysis. Manufacturers or service providers of solvent/ spent acid treatment units are sought for cooperation.

(Ref: 04 IL ILMA OAVB - 13/09/2006)

Preparations for ecological agriculture and liquid waste treatment

An SME from north-western Poland has developed a production technology for preparations used for biodegradation of waste products from plant raising, animal farming, or household. The preparations contain bacterial cultures, and are intended for housekeeping, agriculture, and utilisation of waste products and organic sewage. The preparations are recommended for ecological agriculture. The form of cooperation sought is a commercial agreement with technical assistance.

(Ref: 06 PL WPTS OFXT - 12/09/2006)

Production of biodegradable polymers from renewable resources through sequential anaerobic/aerobic processes

An Italian research group developed a new process the production of polyhydroxyalkanoates (PHAs). PHAs are biodegradable plastics that could have the same range of applications of traditional plastics such as polypropylene, with the advantages of being biodegradable and being produced from renewable resources. The proponents are looking for industries of the plastic sector to set-up a pilot plant for testing the process at larger scale.

Next Events

4-th International Conference Cooperation for Waste Issues

Primary topics of the Conference will be: • Legal and regulatory framework of waste

management • Sanitary, environmental, institutional and economic aspects of waste management • Waste management technologies, equipment and services • Landfill construction and operation • Wastewater treatment. Sludge management. Sludge fields • Air emissions. Gaseous emission treatment. Dust and slag management • Waste to energy • Informational, programming and metrological support • Environmental insurance systems, certification, standardization, audit, due diligence review • Public participation in waste management

31 January 2006 - 01 February 2007 Kharkiv, Ukraine

Procuring Recycled Paper: Free seminars

Recycling Action Yorkshire (RAY) and the Waste & Resource Action Programme (WRAP) are running a series of free seminars for the education, public and private sectors in the Yorkshire and Humber region. The events will introduce the benefits of procuring paper with recycled content and explain how by doing so, these organisations can enhance their reputation and reduce their impact on the environment

27 September - 10 October 2006 Leeds, United Kingdom

6th International Trade Fair for Environmental Protection and Municipal Technology

The fair focuses on environmental protection (potable water quality, wastewater sewage and treatment, flood protection, air protection and solid waste management systems).

10 - 13 October 2006 Budapest, Hungary

Toward sustainable production and consumption

A seminar organised by the PEER network (Partnership for European Environmental Research) with participation of the European Commission.

11 - 12 October 2006 Montpellier, France

[The transport of waste and recyclables](#)

London Remade is hosting its fourth local authority networking event focusing on the transport of waste and recyclables on 16 October. The event will take place at the Institute of Physics in central London from 2 – 5 pm and is expected to be attended by over 150 delegates.

16 October 2006 London, United Kingdom

[The Fakuma international trade fair for plastics processing](#)

The Fakuma started out a very high level right from the start in 1981, demonstrating concentrated specialised competence and providing experts with outstanding contacts and information. Friedrichshafen, located where Switzerland, Austria and Germany converge on one another, provides the Fakuma with an ideal trade fair location. In general, the Fakuma is distinguished by broad-based offerings including processing machinery and suitable peripherals, raw materials and applications, as well as automation solutions, control technology and much more

17 - 21 October 2006 Friedrichshafen, Germany

[WEEE Regulations - Are we ready?](#)

The UK has missed the Waste Electrical and Electronic Equipment (WEEE) Directive's legal implementation deadline of 13 August 2005. Instead the Government has decided

to implement the WEEE Directive's producer responsibility and retailer take-back obligations later in 2006, in order to ensure adequate collection infrastructure is in place. This CIWM seminar will bring together all the key stakeholders to examine the forthcoming regulations and assess what progress is being made in the build up to delivering the directive's requirements.

17 October 2006 Cardiff, United Kingdom

[E-Scrap 2006](#)

Resource Recycling, publisher of E-Scrap News and Resource Recycling magazine, invites you to the premier electronics recycling conference in North America. E-Scrap 2006: The North American Electronics Recycling Conference will feature extensive and detailed industry assessments, including analyses of stewardship systems and trends in the U.S. and Canada, e-scrap collection issues, recycling market factors, and legislative and policy considerations. Presentations will be given by leading experts in electronics product stewardship.

18 - 19 October 2006 Austin, Texas, United States

[E-Scrap 2006](#)

E-Scrap 2006 will feature extensive and detailed industry assessments, including analyses of stewardship systems and trends in the U.S. and Canada, e-scrap collection issues, recycling market factors, and legislative and policy considerations.

18 - 19 October 2006 Austin, Texas, United States

Deriving Energy from Waste

This top-level event will assist you in your drive to divert municipal waste from landfill, maintain your recycling levels and reduce carbon emissions. It will detail funding options and how to generate valuable heat and electricity along the way.

19 October 2006 The Oval, London, United Kingdom

National Recycling Coalition congress and exposition

The Annual Congress & Exposition is NRC's annual education and networking event and is considered the premiere national event for recycling professionals

22 - 25 October 2006 Atlanta, Georgia, United States

Biowaste- Compost - Soil 2006

The event is designed to demonstrate and teach with the help of international experts from best practice examples and success stories under the motto "From the practice for the practice", to exchange experiences, to start networking and offers a unique possibility to share the lessons that have been learned in 20 years decentralised biowaste management and composting. So the event is especially dedicated to decision makers, investors, politicians and experts in the enlarged EU and the acceding candidate countries.

24 - 26 October 2006 Landhaus St. Pölten, Lower, Austria

PLASTUKRAINA 2006

International Fair of Plastics Processing. Technologies, Equipment and Machines for

Plastics Processing, Packaging, Industrial Design, Plastics, Rubber Processing, Recycling

24 - 26 October 2006 Kiev, Ukraine

Entsorga-Enteco

International Trade Fair for Waste Management and Environmental Technology. The new Entsorga-Enteco will cover the entire value chain for waste management and environmental technology.

24 - 27 October 2006 Cologne, Germany

FEAD Annual Conference

FEAD Annual Conference: FEAD is the European Federation which represents the European waste management industry. Members are national waste management associations, which have an approximate 60% share in the household waste market and handle more than 90% of industrial and commercial waste in Europe, with a collective annual turnover of € 50 billion...

26 October 2006 Cologne, Germany

Quarry & Recycling Show

The North American Quarry & Recycling Show is committed to providing a unique opportunity for those involved in the Aggregates, Concrete & Asphalt Recycling, HMA and Recycling Concrete Industries. This is a targeted show that will draw quality attendees from North America and beyond.

26 - 28 October 2006 Atlanta, GA, United States

Eco Expo Asia 2006

In this first ever event of its kind in Hong Kong, Eco Expo Asia will be an ideal marketing platform for a wide range of products and services relating to environmental protection. The trade fair will offer something for everyone, from national governments to individual consumers looking for ways to become more environmentally-friendly on a day-to-day basis.

27 - 30 October 2006 AsiaWorld-Expo, Hong Kong

BIR Autumn Convention

Bureau of International Recycling Autumn Convention

30 - 31 October 2006 Brussels, Belgium

Biogas Markets

Listen, Question and Exchange Ideas with Experts from 17 Countries; Network with Participants from Across the Value Chain; Understand Global Biogas Trends and Business Opportunities plus: Waste-to-Energy, 1st November 2006, a one day seminar focussing on implementing profitable waste-to-energy solutions

30 - 31 October 2006 Vienna, Austria

Efficient Management of Wastewater, its Treatment and Reuse in the Mediterranean Countries (EMWater)

The conference will foster the exchange of experience and present the state-of-the-art on

issues such as low-cost technologies, operation and management of wastewater treatment plants, decentralisation of wastewater treatment, ecological sanitation and wastewater reuse.

30 October - 01 November 2006 Amman, Jordan

Eco-products International Fair 2006

The event is organised by the Asian Productivity Organization (APO), SPRING Singapore, and Waste Management and Recycling Association of Singapore (WMRAS) and co-organised by the National Environment Agency (NEA), Public Utilities Board (PUB), and Singapore Water Association (SWA). The EPIF06 and conference will be the authoritative networking platform for the government and municipal authorities, private sector, manufacturers, consultants, industry players, and other qualified decision makers in the Asia Pacific region with a strong emphasis on environmental development, products, and services.

31 October - 02 November 2006 Suntec, Singapore

Beyond Recycling 06

The first Beyond Recycling conference (held in 2003) was a sell-out, providing a very popular opportunity for local authorities, community groups, central government representatives and others to exchange practical approaches to municipal waste prevention. Now in 2006 we'll not only be taking a fresh look at waste prevention, but also how to make the case for cost-effective waste prevention, at all levels, in practice and in policy.

02 November 2006 Dorchester, Dorset,, United Kingdom

WASMA 2006

The 3rd international forum for waste management

07 - 10 November 2006 Moscow, Russia

Resource efficiency and waste management - achieving sustainable waste practices

With prominent speakers from the waste and construction industry, this conference will take a strategic look at managing waste and will provide practical guidance on how to achieve sustainable waste practices through a series of seminars and workshops. Plenary sessions will analyse the past and current environmental performance of the construction industry, which will enable delegates to benchmark their company performance against industry performance.

07 November 2006 London, United Kingdom

Ecomondo 2006

ECOMONDO strengthens its leadership for the entire waste recovery cycle, sustainable energy, water recycling, reclamation, air quality and risks and safety.

08 - 11 November 2006 Rimini, Italy

Energia International Expo 2006

The unique Exhibition & Forum in Greece, under the auspices of the Greek Ministry of Development, exclusively on Energy Products, Technologies & Processes download the brochure

09 - 12 November 2006 Athens, Greece

11th European Biosolids and Biowastes Conference, Workshop and Exhibition

The conference is now in its 11th year. Over 80 Technical Papers will be presented on Anaerobic Digestion, Biowaste, Compliance and Monitoring, Drying Technologies, Destructive Technologies Odour Removal, Innovations, Operating Experiences and Upgrading, Pumping Conveyance and Storage, Process Developments, Strategic Management, Sustainability.

13 - 15 November 2006 Cedar Court Hotel, Wakefield, United Kingdom

7th Annual NSW Waste Management Conference & Expo

The 7th Annual NSW Waste Management Conference & Expo provides an exciting opportunity for you to showcase your unique products and services alongside your competitors. Presented by the NSW Branch of the Waste Management Association of Australia (WMAA), this combined Conference and Expo will attract major stakeholders from State and Local Governments, operators, industry, environmental consultancies, collectors, recyclers, transporters, researchers, manufacturers, designers, generators, educators and community groups.

13 - 15 November 2006 Sydney, Australia

11th European Biosolids and Organic Resources Conference, Workshops & Exhibition

We now move into the second decade of this successful conference and it is a fitting time therefore to introduce a number of changes to ensure that it remains topical for a further

decade. The first change is in the title of the event itself which has been broadened to encompass organic resources within its remit. It is perhaps true to say that in the environmental area, legislative changes are one the biggest drivers for technology advances and the past few years have been relatively quiet with regards to legislation that impacts directly on biosolids. By contrast organic wastes are now firmly on everyone's agenda and major changes are required both to change the underlying philosophy of how we deal with them and to introduce technologies that can unleash their resource potential. The experiences gained over the past decade in the handling and treatment of biosolids, should provide a headstart for our delegates in tapping this emerging new market.

13 - 15 November 2006 Wakefield, United Kingdom

[World Recycling Forum - Shanghai '06](#)

International Conference & Exhibition on Car, Electronics and Battery Recycling

14 - 17 November 2006 Shanghai, China, People's Rep.

[LARAC 2006](#)

The Local Authority Recycling Advisory Committee is delighted to present this year's LARAC Conference 2006 Packed with a superb line-up of expert speakers from some of the recycling world's key organisations, LARAC Conference 2006 is THE essential recycling event for you. The conference includes numerous case studies from some of the most inspirational local authorities in the UK, to help you strengthen and advance your recycling and waste management strategies.

15 - 16 November 2006 Bournemouth International Centre, United Kingdom

ENVIRONMENT 2006

8th International Environmental Engineering and Technology Fair.

15 - 17 November 2006 Tallinn, Estonia

Entech India 2006

South asia's only international exhibition & conference on environmental technology & renewable energy

16 - 18 November 2006 Mumbai, India

European Bioplastics Conference

The high level two day conference will be THE event of the year for the European bioplastics industry. European Bioplastics will make this event a platform for business matching and dialogue. Sufficient time will be provided to meet and encourage the development of collaborative relationships amongst participants. Attendees will be representatives from the industry and related areas. Politicians and media representatives will be our invited guests.

21 - 22 November 2006 Brussels, Belgium

Austria - Waste Management Conference

From November 22nd through 24th, 2006 representatives from the scientific world and business are meeting for the eighth time at the DepoTech in Leoben, Germany. The focus: waste and landfill technology, contaminated sites and sustainable waste

management. Practical experience or scientific work is welcome as lecture or poster.

Deadline for the submission of papers is February 28th, 2006.

22 - 24 November 2006 Leoben, Germany

Depotech 2006

With more than 400 participants DepoTech has developed into Austria's biggest waste management conference. The up-to-date topics, the quality of the lectures, the organizational set-up have contributed to DepoTech's reputation far beyond Austrian borders. Already for the eighth time, representatives from science and industry will meet between November 22 and 24 to discuss current topics on waste management and technology. The conference will focus on waste management, waste- and landfill technology and contaminated sites.

22 - 24 November 2006 Montanuniversität Leoben, Austria

Waste Facilities Audit Association (WFAA) Annual Conference

The Waste Facilities Audit Association - WFAA is a non-profit making association of companies who in the course of their normal business activities generate waste. The WFAA was formed in 1993 principally in response to tightening legal environmental requirements, increased cost of waste disposal and increased public and corporate expectation.

27 - 28 November 2006 Ware, Hertfordshire, United Kingdom

POLLUTEC 2006

The key global meeting for environment professionals, Pollutec Lyons brings together 2,400 exhibitors covering a range of sectors, equipment, technologies and services and 65,000 industrialists, local authority managers and specifiers for 4 days of outstanding business opportunities.

28 November - 01 December 2006 Lyon, France

Designing and Recycling Electrical and Electronic Equipment 2006

ERA Technology is pleased to announce that its flagship annual conference, Designing and Recycling Electrical and Electronic Equipment. The event will provide a forum for discussion of best practice and is an ideal complement to ERA's suite of products and services aimed at ensuring the safe and successful route to compliance with the EuP, WEEE and RoHS directives.

28 - 29 November 2006 Gatwick, United Kingdom

ECOMA 2006

ECOMA (ECO-MANufacture) is the only Show & Conference to support corporate management coexisting with environment within the manufacturing industry, in Japan. Firstly held in November 2004 at PACIFICO YOKOHAMA, secondly held within INCHEM TOKYO 2005 in November 2005 at Tokyo Big Sight, and again, the third ECOMA will be held in PACIFICO YOKOHAMA expanding its scale.

29 November - 01 December 2006 Pacifico Yokohama, Japan

CWRE 2006 - Canadian Waste & Recycling Expo

As the nation's only tradeshow serving this multi-billion dollar industry, CWRE will

continue to focus on the collection, hauling, processing and disposal of waste.

29 - 30 November 2006 Toronto, Ontario, Canada

[The Composting Association's Annual Conference & Exhibition](#)

2013 is a key date for everyone involved in composting. It might seem like it's in the distant future but in order for you to achieve your goals then you need to have the ground work in place now. On the way to 2013 there will be opportunities and threats for you to deal with and how it's how you manage these that will determine whether you will be successful in 2013. This conference is your guide to meeting challenges of 2013...

06 - 07 December 2006 Brighton, United Kingdom

[Global Waste Strategies Summit](#)

Global Waste Strategies Summit 2006 will bring together the most advanced waste technologies and waste management best practices from around the world, to address key questions for UK local authorities on achieving waste targets.

11 - 12 December 2006 London, United Kingdom
